

BUSINESS AND ECONOMICS

The intention of the Business and Economics department at Weald of Kent Grammar School is to develop in our students a curiosity about the world around them and an understanding of how businesses and the economy works. We encourage our students to consider the role of business and finance in wider society and to question how factors of production are allocated. We wish to promote an understanding of our place in the wider economic world and to prepare students for the various roles that they will play within it including as consumers, employees and potential entrepreneurs. Our students develop analytical and evaluative skills; we encourage them to question data and to be willing to explore the stories behind a headline or statistic. We aim to provide an environment where students have opportunities to develop key skills such as working in a group, giving presentations and conducting research, which contribute to success within a business environment. We are keen to improve financial literacy and ensure that our students develop a knowledge and understanding of key business and economic concepts including those relating to personal finance.
